

5-D-Water

Description

5-D-Water opens up a new/further perspective of reality (definition of dimension). The most apparent effect on our body is a feeling of lightness, almost floating and at the same time being aware of every single cell. The best way to experience this is to fold up a field as 3-D-space: in a plasma-tube-station around the body or using 2 plasma-pads or any other devices with at least 2 sides. 5-D-Water supports you with every form of transformation or letting go, because it lifts up the physical body.

a jar with 500ml of distilled water (real aqua dest. -no osmosis water from hardwarestore), mix it again with nc-copper mixer and now we have a potentiated 1:100 dilution. Again wait for another 12 hours, take of 5ml and add to a new 500ml jar of distilled water and mix again. Now we have a potentiated dilution of 1:10.000, -a water-essence.

From now on we have activated a new potential of water which is now easier to be reached or used for us: 5-D-Water. It could be that physical GANS develops during this process or at some stage later, but it is not necessary for using the water with great benefits.

Love and incredible experiences!
Virko Kade

Production

To start of with we need a water with very special quality: I call it „vertical water“. This could derive from either a waterfall or an artesian well. It should move by its own intention in a vertical direction and should be undisturbed by any human influence. This water has to undergo a physical and energetic cleansing first. Both happens by adding some CuO-GANS water+particals (e.g. 10ml in a syringe added to 500ml of vertical water). As soon as the GANS particals have sunk to the bottom immediately take of the clean water above.

Next step we stirr the water with a nano-coated copper-mixer (1-2 min, clockwise seen from above) and let it sit for at least 12 hours.

From this water we take a small amount with a syringe (e.g. 5ml) and add this to
